Lutheran Pastors Hold Successful Conference at Blueberry Church.

Pastors and Teachers Meet to Discuss the Work of the Church.

From April 17—19 twenty Lutheran pastors and teachers of the Missouri Synod met at Pastor Hy. Kuring's Church in Blueberry District for their annual spring convention. Doctrinal essays and reports of the work of the Church were heard from a number of pastors and officials.

A highly interesting essay was presented by Rev. B. F. Behrends of Beaver Hills on the account of Creation as found in Genesis 1. The speaker brought overwhelming proof for the doctrine of Divine creation and denounced in no uncertain terms all theories of Evolution. Commenting on the meaning of the term "day," the essayist stated: "A careful examination of this word, as found in the original Hebrew reveals the fact that it can mean nothing else than a period of 24 hours, so that heaven and earth and all creatures were created by God in six ordinary consecutive days, each day consisting of 24 times 60 minutes."

A note of optimism prevailed at the Conference, and according to information given by Rev. C. Tries, Supt. of Missions, the work of the Alberta & B. C. District shows a steady and healthy growth in spite of economic distress.

Four candidates for the Ministry will likely be placed into various parishes within the next few months.

An entirely new mission field was recently organized in the Peace River district at Clear Prairie, some 200 miles N.W. of Grand Prairie; and the call to this parish was accepted by Candidate H. J. Krusch of Ottawa, Ont. The ordination of the latter was performed on Wednesday Eve. in conjunction with the pastoral service. Rev. A. H. Raduoz of Tomahawk delivered the communion address and President W. C. Ebert of Leduc the pastoral sermon, after which all guests received holy communion.

Representatives of Concordia College reported a widespread interest in this pre-theological training school on the part of many members of its constituency. At a recent kitchen shower held at the College over 150 ladies donated \$125 worth of victuals and \$100 in cash. Donations included 340 doz. eggs and 90 lbs. butter.

Meals and lodging were provided the visitors by Pas-

Bus Now on Regular Service.

Jerry the Busman arrived here Saturday Aft. with his re-furnished conveyance loaded to the ginnels with passengers for western points. This was his first trip since the bus was put on some three weeks ago, and it is quite probable the service will continue daily thru the summer.

For the convenience of passengers from Stony and other ports of call a new bus depot four times the size of the present premises is under construction, and will be ready for occupancy on Tuesday, the 1st of May. The new building, 100x50 ft., is located at 102d St., and 102d Ave., right across the street from the present depot.

Stony Plain Co-op.

At the meeting last week of the shareholders in the Stony Plain Co-op. Store, a few changes were made in the personnel of the operating branch. Mr. W. T. Propp, the president of the association, resigned. Mr. Magnus Larson, the efficient and courteous manager of the store here, also handed in his resignation, owing to his attention being required in his other affairs. His place has been taken by Mr. Murray Barnes of Hansen's Corners. The Co-op. has on hand, at their storehouse here on 2d Ave., a various assortment of goods farmers will always be requiring, including flour, kerosene, gas, fuel oil, oil, etc. The new manager takes hold May 1st, and it is expected he will reside on the premises.

A Fine Proposition.

The Sun has been informed that the blue-prints for the structure on lots 1 and 2 block 3, Main St., are about completed and are at present under consideration. The preliminary sketch shows a building 100 x 40 feet, leaving a safety area on the south side of about 20 feet. The plan of the ground floor provides for a spacious dining room with conveniently situated alcoves on the north side for those desiring privacy while dining; with a mezzanine running the full width of the building, providing ample space for a full orchestra.

On the second floor there is tentatively proposed a dancing space the full size of the structure, less the space for a cloak room and a good-sized dais. On this floor it is planned to have stained glass oracles, while the walls will be adorned with murals by several of our local celebrated artists.

No Raise in Price of Twine.

Those who had feared that the changes in the tariffs as announced last week from Ottawa would have the effect of raising the price of binder twine here, may set their fears at rest, as binder twine prices will not be affected as a result of increased rates on jute wines. All binder twine used in the West, it is pointed out, is made in Canada and it is made of either manilla or sisal fibre, no jute being used in the manufacture whatever.

HARDWICK'S

Ladies' Spring Hats.

Another shipment this week.

Princess Ribbed Cotton Hose for fine wear; Sunglame shade; sizes 5 to 6½, 7 to 7½, 8 to 10; per pair, 29c.

Smartly Styled Girls' Wash Frocks; smart Bolero front; plain Chambray and Printed Broadcloth; sizes 8 to 14 years; 79c. each.

Men's Caps for Spring and Summer just arrived; all sizes and popular patterns; \$1 each.

Bulk and Packet Seeds—A full line of McKenzie's, Rennie's, Steele-Briggs's, and Simmers's.

Grocery Specials; Lots of them.

Get It at HARDWICK'S.

A Record Of Service

Forty-four years as member of any parliament, even in the inconspicuous role of a back-bencher, would be an impressive record of service and endurance. It would indicate, at the very least, a tremendous capacity to resist boredom and endure platitude.

Forty-four years as member of the British parliament, where the M.P.'s job is pretty much a full-time affair, is almost a transcendent feat, for, at Westminster, oratorical standards differ but little from those of parliaments and legislatures nearer home.

Forty-four years as member of the British parliament, thirty of them in the very forefront of polemical politics, twenty of them in the role of an imperial as well as a national figure, and, at least ten of them as a world luminary, represents something, however, which cannot be judged by ordinary criteria.

Forty-four years as member of the British parliament, during eighteen or so a member of the cabinet and six of them spent as war-time premier, the dynamic centre of a whirling world—that is the consummate achievement which fell to the lot of a little Welsh lawyer.

David Lloyd George: Perhaps it was unnecessary to mention the name for, were it posed to any group of intelligent citizens within the British empire, it is doubtful if the juxtaposition of "forty-four years" with "war-time premier" in the question, would fail to elicit the right answer.

David Lloyd George has just celebrated his forty-fourth year as member of the British parliament. In that long term, the little Welsh lawyer who entered the portals of the "Mother of Parliaments" with none of that political background which, prior to his advent, was deemed essential to ministerial rank, has run the full gamut of political achievement; has scaled the dizzy heights and been dashed from them; has tasted the sweet fruits of popular acclaim and the bitter of obloquy. Spectacular always, in success as in defeat, his is perhaps the most amazing personality in its very contradictions of a generation replete with outstanding figures.

To-day, in the quieter nooks of political life, the old fires burn dim—but they still burn. The flash of those "limestone" days which added a word to the English language is recalled, over and over, as he enervates warnings and behests a heedless world needs not. From the couch of the prophet, or the desk of the mentor, he sallies, occasionally, to guide and to counsel those who, caught in the full flood of the stream, pay little attention to what adumbrates the stiller eddies of the backwaters. In sickness or in health, one word of contumely brings the old fires forth. Jove still can thunder—obligational!

His attendance at sittings of parliaments is rarer than it used to be, but a strange reaction follows his periodic entries. Be the debate never so dull, when Lloyd George appears members rouse themselves from lethargy and prepare for action. Imperceptibly, a ripple animates the house; electricity is in the air. Lloyd George has entered! Surely here, despite the fact a whirling world has thrown him from the vortex, is anything but a spent force.

Two or three weeks ago, he celebrated the forty-fourth anniversary of his election to parliament. If he were asked what is his fondest recollection over all those years, undoubtedly, his answer would be: It had been given him to retain the respect, the loyalty, the confidence and the affection of his own constituency of Carnarvon. That is, perhaps, the most amazing feature of his amazing record. For forty-four years he has enjoyed the unbroken loyalty of his constituents. For forty-four years he has enjoyed their confidence, their respect, their affection. Surely no man could ask more. That is the mead of his service and the gauge of his success.

Ease Pain, Headache
in Few Minutes

For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet discovered.

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And thus is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer is the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

Wizard At Illumination

Nova Scotia Man Planned Many Spectacular Lighting Effects

Walter D'Arcy Ryan, famous creator of lighting effects and director of the illuminating engineering laboratory at the Schenectady works of the General Electric Co., died recently of a heart attack at his home in Schenectady.

Born in Kentville, Nova Scotia, 63 years ago, the son of the late ex-Mayor and Mrs. J. W. Ryan, Walter Ryan had for many years been known as the "wizard" of illumination.

He was the man who had outshone the Aurora Borealis or the scintillating stars of a moonlight night with electrical effects of his own devising. For instance, the illuminating of Niagara Falls, the magnificent lighting effects of the Panama-Pacific Exposition in San Francisco; those of the Exposition in Rio Janeiro, Brazil; the Washington Arms Conference; the Silver Jubilee of the City of New York; the Altar of Victory in Chicago; the Republic Eagle Sunburst, during the National Convention in Kansas City, and his most marvellous achievement of all, the lighting of the 1933 World's Fair in Chicago.

Of this Nova Scotia-born engineer, Thomas A. Edison once said: "This man Ryan has performed miracles."

Japan's Rivalry May

Cut Living Standard

American Diplomat Says Competition Hard To Cope With

Japan's commercial rivalry ultimately may result in a lower standard of living throughout the world, Richard Washburn Child, American diplomat, said.

Child, in Europe as President Roosevelt's special representative to study and improve trade conditions, said he had come to the conclusion during his two week's study in Great Britain—first stop on his trade tour. He admitted that at present he discerned no means of coping with the increased commercial rivalry of the Japanese, with their lower wage scales and production costs, which threatens to wreck the English textile trade abroad, including India.

"My British friends told me that they believe the Japanese technical efficiency is at least as vital a force in enhancing Japanese competition as lower wages and their living standard," he added.

Safety Of Mail Bags

England Lost Only One Out Of 40,000,000 Last Year

Only one of more than 40,000,000 mail-bags, each containing an average of 5,000 letters, had come to grief last year in Britain up to the end of October. And that bag contained nothing of value. A few years ago the average number of mailbags stolen in a year was more than 60, while there were frequent attacks on officials in isolated post offices. There have been few such attacks this year—none of them successful. A reorganization scheme involving close co-operation between Scotland Yard and the special investigation department of the Post Office police throughout the country is responsible for the improvement.

Despite Price Rise
Tea Still Most
Economical Drink

For the past two years people in Canada have been enjoying the lowest prices for tea in a decade, but this has meant tremendous losses to growers who, to save their industry, have restricted tea exports and caused prices to advance. Tea packers, particularly those supplying very fine quality teas, have reluctantly been forced to increase prices.

New Radio Telephone

A novel ultra-short-wave radio telephone sending outfit, operating entirely from self-contained dry batteries, which weighs 15 pounds and is capable of sending spoken messages clearly over distances of more than a mile through city streets, has been developed. The wave-length utilized is 100 centimeters or about 39 inches.

The Safety Of Surgery

Technique So Perfect Now Could Hardly Be Improved

"The operating table is safer than the crowded streets outside," says a noted British surgeon.

Not long ago another surgeon, Lord Moynihan, declared that the technique of surgery is so perfect nowadays that he did not see any way in which it could be improved. We sometimes read that So-and-So died after an operation. The phrase is somewhat unfortunate, because it carries the suggestion that the operation had something to do with the cause of death. It is not the operation that causes death, but the disease or injury which made the operation necessary. The operation was the only chance of saving the patient's life, and either the operation had been delayed too late, or the injury was too severe.—St. Thomas Times-Journal.

India's oldest society, the Asiatic Society of Bengal, recently celebrated its 150th anniversary.

Worth Fabulous Sum

Russian Crown Jewels May Be Shown At Chicago Fair

The Russian crown jewels, valued at nearly \$250,000,000, and one of the richest treasures of precious stones in the world, will be displayed at the Century of Progress Exposition in Chicago this summer if the Soviet authorities grant a request they have received from exposition authorities that the gems be lent for the period beginning May 26, when the fair re-opens. The authorities have the request under advisement. The collection, which is assembled in an isolated storeroom in the State Bank at Moscow and is guarded day and night by Red soldiers includes the crown used at the coronation of Catherine the Great and her successors, which is said by experts to be worth \$52,000,000. Almost 5,000 diamonds, together with a great ruby, go toward making up its weight of five pounds.

Producing maple trees on eastern Canadian farms total 70,000,000.

Household Drudgery
The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to go through the household drudgery without any relaxation. Is it any wonder she becomes nervous and irritable, has hot flashes, faint and dizzy spells, shortness of breath, sinking and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milburn's H. & N. Pills a remedy to strengthen the system and bring back the much desired health.

Head Of Canadian Society Of Technical Agriculturists Refers To The Problem Of Production

The March number of "Scientific Agriculture" contains a special address at the annual meeting of the Ontario Agricultural College Alumni Association by Dean A. Howes, Dean of the Faculty of Agriculture, University of Alberta, and President of the Canadian Society of Technical Agriculturists. In agricultural circles, says "Scientific Agriculture" it has been customary to recognize Dean Howes of Edmonton as the "Dean of Deans". He is the senior among the heads of agricultural colleges in Canada, both in age and in years of service. While it may be true that some of our technical agriculturists were swamped with the routine of administrative duties, or the intricacies of scientific investigations, Dean Howes always keeps before us the needs and the aspirations of the sometimes-forgotten man, the farmer. The address is an epitome of rare agricultural wisdom embracing as it does the whole gamut of agriculture in actual practice, economics, and philosophy. Speaking of production and marketing the dean said "I have often on one heard that in the past few years the statement 'we have solved the problems of production but we have paid little or no attention to the problems of marketing.' Every time I have had the opportunity, I have raised my voice in protest against this sweeping statement, simply because it is not according to fact. That we have not paid enough attention to the machinery of marketing, I am quite ready to agree; also that one of our major enterprises should always be proper distribution of our products; but when people say that we have solved the problems of production, I must take exception to no uncertain terms. The fact of the matter is that we, in this far-flung country of ours, are mere children in the matter of production. If there has been over-production quite recently, and that is still regarded as debatable, it is absolutely no proof that we have solved the problems of production. Moreover, it must not be forgotten that sound marketing system and cannot be divorced. They are as inseparable as Mutt and Jeff, or ham and eggs,—indeed more so."

Extensive Sound Range

Cat's Hearing Far More Acute Than Human Beings

If your house cat pricks up his ears as if what seems to you a distant silence, don't blame it on his imagination. He may be listening to the footfall of a mouse a block away.

Proof that the lowliest alley cats can hear and associate sounds far beyond the range of human hearing was presented to the Atlantic Otological Society convention at Atlantic City, N.J., by Professor S. F. Dworkin of McGill University.

Cats trained to associate certain sounds with food were exhibited to the group of scientists and the volume of the sounds was progressively decreased far out of the range of the human ear but the cats continued to respond. The sounds were made by an electrical contrivance. Slight variations in pitch which the cats understood from previous experience did not mean food, they ignored.

Human beings can hear sounds of from 12,000 to 20,000 cycles per second frequency. The cats respond to frequencies up to 50,000 cycles per second, showing their hearing was more than twice as acute as that of a normal human.

One Manufacturing Basis

Farm production in Canada forms the basis of many of Canada's great manufacturing and processing industries to an extent that is not generally appreciated. In 1921 (the last year for which complete statistics are available) 9,298 establishments were engaged in manufacturing products of farm origin. Of the number, only 327 firms were working with foreign agricultural products, principally rubber, sugar and coffee.

W. N. U. 2043

To Protect Oil Fields

Any Discovered in British Isles Will Be Property Of State

The British parliament is preparing legislation to insure that any oil fields discovered in the British Isles shall be the property of the state. This procedure is evidently due to the reports that oil has been discovered in the neighborhood of Worth, in Sussex, at a depth of 1,876 feet.

It is known that some Americans with experience in the oil fields of this continent have been drilling in various parts of England for the last two or three years but apparently the Worth project is the only one that has given indications of success. According to the records, petroleum in commercial quantities has never before been found in the British Isles. The enormous deposits of coal might suggest that deep drilling would produce oil.

By Ruth Rogers

GRACEFUL AND SLIM LINED COSSACK TYPE SUIT AND WHAT AN EASY AFFAIR TO MAKE

There's chic and newness about this charming Cossack type suit. There's slimsness too, contributed by the centre-buttoned closing. Bright red woolen made the original of this mode. The belt is self fabric. If your waistline is slim, it is very smart worn with a wide patent leather belt.

Twisted wools in taupe or navy blue woolen with white pencil stripes is most attractive scheme. Style No. 664 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust.

Size 16 requires 3 1/4 yards of 54-inch material with 1/4 yard of 27-inch interfacing for collar. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

A Luxurious Airship

Veritable Hotel Of Skies Is Being Built In Germany

The German airship LZ 129, a veritable hotel of the skies, is reported as in an advanced stage of construction. The Berliner Tageblatt published further details of the ship, showing it will place the comforts of air-travel almost on a level with those of ocean-travel.

The central portion of the ship, which will be reserved for passengers, will have cabins, the restaurant and public rooms on the upper deck. The smoking room and the kitchens will be on the lower deck.

The dining room will be 60 feet long, connected with the kitchen by electrically operated dumb-walkers.

The windows of the airship will be built in such a manner that the passengers will be able to look down as well as in other directions. There will be a drawing room and reading room in addition to the 25 cabins.

Each cabin will have two beds, a cupboard and wash basin with running water. The smoking room will be built in such a manner that passengers may smoke without danger of fire. Next door to it is the bar. The LZ 129 will be driven by four motors of 1,000 horsepower each.

Sodium Sulphate

Saskatchewan Production Showed Big Increase Last Year

Production of sodium sulphate in Saskatchewan increased in 1932 to 78 per cent. in 1932 compared with 1932, according to a bulletin of the department of industries, issued recently.

Paper pulp manufacturers afford a considerable market for this material, and another valuable outlet is its use in the metallurgical treatment of the nickel-copper ores of Ontario.

Production in 1933 was valued at \$485,416 as against \$271,736 in 1932, an increase of 78 per cent.

Proved It Was Palatable

There is little chance of liquid air, cooled by 500 degrees below zero, ever becoming a popular soft drink, but just to prove it was palatable Professor J. Satterly, physics department at University of Toronto, quaffed a beaker full of the solid and breathed out large quantities of foggy smoke. The demonstration was made when the physics department staged an "at home," with Dr. E. F. Burton as host. It was attended by 500 delegates to the Ontario Educational Association.

Landlady: "I'm sorry the chicken soup isn't good. I explained to the cook very carefully how to make it, but perhaps the didn't catch the idea."

Boarder: "It tastes to me as if it was the chicken she didn't catch."

The Scientific Development Of Rust-Resistant Wheat Marks An Epoch In Western History

Name Little Known

German Photographer Who Originated Picture Postcard Is Dead

Alfred Adolph, 80 years old, died a short time ago at Passau. Perchance Herr Adolph was well known in his own German city, but outside of Passau his name meant nothing. Yet his work lives, and will continue to live for a long time. For Alfred Adolph was the originator of the picture postcard.

Fifty-five years ago Herr Adolph, who was a photographer, printed the first postcard souvenir. Specimens of these are now in the German National Postal Museum. It was really not as simple as it seems, for Adolph had to devise a special press for the business. It was a venture involving outlay and a chance of loss.

The banalities of picture postcard messages are proverbial. "Having good time; wish you were here" has become a popular classic. It is really the best of all post card notes for it involves no mental effort. Wisecracks and smart-Alec messages are less numerous for they carry no joy to the recipient, and if they have ever half a germ of originality they involve a certain amount of brain fatigue for the sender.

On the whole though, the world would be duller without Adolph's picture cards. Everyone likes to know where his traveling friends are and what they are seeing. And it is also true that in this matter he who gives is more blessed than the one who receives, for it affords the sender a chance to brag.

Should Act As Bracer

People At Fifty "Right In Pink"

States Doctor

A cheery message for men of 50 is that which comes from Dr. James Cotton co-founder of two Toronto hospitals. He says a man of fifty "is right in the pink." And he adds that age does not mean years in respect to the body. "Some men are old at fifteen; others young at eighty," he says—and he declares that a man of fifty, because of his sturdier physique, can endure more than a boy. Perhaps there is not much new in the good doctor's statement but it is a fact that many men of fifty become depressed at the fear that they are growing old. His words should act as a bracer for them.

Clocks and watches having two faces, one at the back and one at the front, are now being manufactured in France.

South Africa expects its 1934 wheat crop to total 3,001,000 bags.

HAZARDS OF A CAMERAMAN

While one cameraman is being vigorously tackled by an unwilling subject, another "Knight of the Lens" calmly snaps the action. This unusual photograph was made in Paris as General Bardi de Fourton, whose name was mentioned in the Stavisky scandal, charged a photographer who attempted to take his picture.

The discovery of rust resistant wheats is an epoch in the history of this Western country. One of the powerful enemies of wheat has been met and conquered. Dr. H. M. Tory, of the Dominion Research Council, states that since 1916 the loss from this parasite has been \$600,000,000. This is in money, \$30,000,000 a year. What it has meant in blasted hopes, and beaten men cannot be computed.

Rust has come upon wheat at its flowering time and has flourished best among the thick standing crop. It has swept down in the hot nights of July, especially when the rain has washed the heavens blue and made a picture past praising of the golden waving grain and the soft silver air. Sucking the sap from the stock it has left it standing a mockery of emptiness. "The rust has sucked the life out of the wheat," said the light from eyes and the strength from bithely swinging arms.

Ten years ago the Dominion Rust Research Laboratory at the site of the University of Manitoba began this investigation. It got its start when wheat from Minnesota, and at the Port Gary site and the Brandon Experimental farm, commenced its breeding experiments. When victory dawned in the laboratory, there followed milling and baking tests in which it was practically as good as the Marquis and Reward. All tests so far have been within the orbit of laboratories. This season will see these tests widened to include commercial concerns. The new wheat will not be distributed until it is certain that it can "take it" with the farmer as well as under the sheltered conditions of the experiments. However, it has been discovered that as well as being resistant to rust, the new variety is also better able to withstand other diseases such as smut than are the varieties now in the field.

Incidentally it should not be forgotten that as well as the agriculturalists, the scientists of the Rust Research Laboratory and of the prairie universities are open to congratulations. Their victory is not only of enormous practical value but it is victory in the world of knowledge and an outstanding one, both on account of the numbers in other places on the continent who are engaged in this research, but also because of the team work displayed among the "players" and of the devotion for "the side." The total cost of the whole thing is given as \$250,000. As a matter of fact, this does not include what the universities have contributed in time and devotion and what the scientists themselves have contributed in interest of the kind that cannot be bought—Winnipeg Free Press.

Terrors Of Sargasso Sea

Investigator Has Found Seamen's Story Has No Foundation

After several months' investigation in the Sargasso Sea, an expert from the Natural History Museum, South Kensington, returned with tangible evidence that there are no terrors in that dread part of the Atlantic. Exhibits were brought back to show that the seamen's traditional story of the Sargasso's impeding mass of floating material through which no ship could make its way, has no foundation in scientific fact. The investigator, on his return to England, said the exhibit would prove once and for all to the ordinary mind that the Sargasso fantasy was pure imagination. "There are, he stated, vast stretches of floating vegetation extending in green and yellow patches as far as the eye can see, but never thick enough to prevent the progress of a ship."

Temperature of the air decreases gradually, up to a distance of about six miles from the earth.

ALMOST GENERAL APPROVAL OF BUDGET SHOWN

Toronto.—First reaction to the budget of Hon. E. N. Rhodes, Dominion finance minister, came at Vancouver, where gold mining issues on the stock exchange declined sharply on news that a 10 per cent. tax would be levied on the yellow metal.

Experts estimated the tax would bring the treasury more than \$40,000,000 in the next year, taking into account rapid expansion being made by large mining companies. It was not believed, however, that the tax would have an adverse effect on mining activities.

Other provisions of the budget brought forth almost general approval. Sugar wholesalers said decision to cut the tax on that commodity from two to one cent a pound would have little effect on them as the cut would be passed on to the consumers just as the original tax was last year. In some quarters it was said reduction of the tax might result in about a 10 per cent. increase in sugar sales, but many firms handling sugar said they expected no heavy increase in sales anyway until the beginning of the fruit preserving season.

Bakers said the reduction in the sugar tax would have little effect on them, but expressed keen pleasure over abolition of the six per cent. sales tax on cakes and pies. This measure, they expected, would result in considerably increased sales.

Winery officials expected an increase in consumption of sparkling wines as a result of the decision to cut the tax on those beverages from \$1.50 to 75 cents a gallon. Stewart McClenaghan, chairman of the liquor control board of Ontario, said it was "a move in the right direction." Brewers of the more humble fluid, beer, said the decision to merge the three-cent-per-pound duty on malt with the 12½ per cent. gallstone tax would have little effect on their business and that prices would not be reduced.

Headquarters of the United Farmers of Ontario viewed with interest announcement of Mr. Rhodes that legislation would be introduced to ease the burden of farm debts. Secretary H. H. Hannam said something would have to be done to lighten the debt load unless steps were taken to raise values of farm produce. He recalled his organization had urged refinancing of farm mortgages and reduction of interest charges as a means of scaling down debt payments to something like the depressed level of farm prices.

Sir John Alder, president of the Canadian Bank of Commerce, stated a reduction in interest rates on savings accounts "might have the effect of inducing people to buy bonds."

Sir John said he had not been anticipating any reduction in interest rates. "I don't think the move was discussed with bankers, unless it was with Jackson Doda, chairman of the Bankers' Association," Sir John stated.

Battle Tuberculosis

Quebec Province May Adopt Lines Employed By Saskatchewan

Montreal.—Attempts to battle tuberculosis along the same lines employed by Saskatchewan will be made by Quebec. It was learned here, as various anti-tuberculosis societies gathered to make preparations for the convention of the Canadian Anti-Tuberculosis Society Association here June 6, 7 and 8.

J. J. McGurran, member of the Saskatchewan commission, was asked to attend the meeting, officials said.

Resources Case

Ottawa.—The Dominion government and the province of Saskatchewan reached an impasse in the \$200,000,000 natural resources suit before the Dyarst natural resources. Adjudgment was taken until May 14. The long adjournment was made to allow preparation of further evidence by federal departments.

W. N. U. 2043

Relief Problems

Officials Of Western Provinces Hold Conference In Edmonton

Edmonton.—Relief officials of the four Western provinces completed a conference on the common problems of relief administration and discussed the question of uniformity, especially in the matter of food allowances for the three prairie provinces.

The conference was described by Hon. J. A. Merkle, minister of railways, labor and industries in Saskatchewan, and chairman of the meeting, as the "most satisfactory for some time" in a statement issued to the Canadian Press.

He declared that the conference studied food quotas for the prairie provinces, and that British Columbia, being a little differently situated as it is more of an industrial territory, "sat in."

"We discussed," Mr. Merkle said, "the matter of the back-to-the-land movement and also the possibility of a new agreement in relief which we are expecting to secure from Ottawa. The old agreement ran out on March 31 and the provinces have been working at loose ends. However, we expect authority to carry on as in the past and expect a similar federal percentage as it was in the 1933 agreement."

Officials present at the conference were L. W. Griffith, relief administrator, British Columbia; from Winnipeg, Hon. W. R. Clubb, minister of public works; and A. MacNab, assistant deputy minister; from Saskatchewan, Hon. J. A. Merkle, and Thomas M. Molloy, deputy minister in his department; Alberta, Hon. O. L. McPherson, minister of public works and Walter Smitten, provincial labor commissioner.

Prohibit Smoke Screens

National Revenue Department Futs Ban On Importations

Ottawa.—The department of national revenue comes to the aid of the civic authority in the addition to the list of articles whose importation into Canada is prohibited of "smoke screen apparatus, for use on motor vehicles or on water-borne craft of all kinds."

It is understood that this prohibition was made at the request of the Royal Canadian Mounted Police, who, in pursuit of their anti-smuggling activities, have encountered both automobiles and gasoline launches equipped with devices for the spreading of smoke-screens. This facilitated the escape of the law-breakers.

The police figure that no citizen occupied in any peaceful pursuits requires apparatus for the making of screens.

Graceful Gesture

Irish Harps Removed From The Realm Of Taxation

Ottawa.—Hon. E. N. Rhodes, finance minister, having granted a great concession last year to the Scot in placing importations of bagpipes on the free list, made a graceful gesture to the Irish in similarly removing from the realm of taxation importation of harps. The minister's action a year ago provoked passage of praise from exiled Caledonians who were quoted as declaring this would "encourage the study of music in Canada."

The harpists have yet to be heard from.

Lower Tariffs

Ottawa.—Downward revision provided in the 72 changes in the customs tariff announced in the budget. Reductions under all tariffs were 24; reductions under British preferential only, 15; reductions under intermediate and general only, 13; increases under intermediate and general only, two; increases under all tariffs, one, and clarification of wording only, 17.

Regulations Extended

Ottawa.—Extension of butter and dairy grading under Dominion regulations was provided in a bill passed through the House of Commons. It placed further restrictions against butter substitutes, vested department of agriculture inspectors with power to seize dairy products not graded in conformity with the regulations and increased penalties for violations.

CELEBRATES

The Earl of Athlone, brother of Queen Mary, and a popular member of the British Royal Family, who celebrated his 60th birthday on April 14. The Earl of Athlone is a former Governor-General of South Africa.

Attempted Train Wreck

Obstruction Is Placed On Track Of Canadian National

Saskatoon.—Attempt to wreck a Canadian National Railway passenger train one mile west of the Vancouver water tank was disclosed here.

One new tie and pieces of steel cylinder supporting it were placed on the track by persons unknown. The engineer of No. 9 passenger train, bound for Calgary, saw the obstacles and applied the emergency brakes just in time.

No damage was done to the locomotive. As it pulled to a stop it broke the tie across the rails.

Royal Canadian Mounted Police and Canadian National Railway investigators are understood to be co-operating in an investigation.

Salt Lake Speed Course

Shores Of Great Salt Lake In Utah May Be Used By Sir Malcolm Campbell

Salt Lake City.—William F. Sturm, American representative of Sir Malcolm Campbell, holder of the world's automobile speed record, announced the shore of Great Salt Lake would meet requirements for the speed department's new record attempt next summer.

His announcement followed a decision of the junior chamber of commerce here to attempt to raise a \$10,000 fund to guarantee expenses of the test.

Cannot Take Pictures

Singapore.—Roy Tuckett, British aviator, now flying from Great Britain to Australia to photograph the air route of next October's race, was forbidden by the Netherlands government to take pictures of the Dutch East Indies and decided to return to London.

FLYING ON HIS OWN POWER

Discounting the leucis myth, Erich Kocher, German aviator, becomes the first man in the world's history to fly through space using only man-power. His flying device has rotors instead of wings, and propulsion power is supplied by wind from the flier's lungs. He is shown in flight near Berlin, last, operating the "lung-power" motor.

Tax On Gold

Revenue To Be Collected Depends On Price Of Precious Metal

Ottawa.—The total revenue the government will collect from the 10 per cent. tax imposed on gold in the budget presented by Hon. E. N. Rhodes, minister of finance, depends entirely on the world price of gold. The tax is payable on the metal when delivered to the mint or exported but the full 10 per cent. can not be collected in whole if its result was to give the producer less than \$80 an ounce.

In other words, the effect of the limitations on the collection of the tax, to all intents and purposes, one of ensuring to the producers—so far as such assurance can be given, having regard to world price fluctuations, a minimum of \$80 an ounce.

In making his announcement the minister declared that this import would compensate for the reduction of revenue resulting from his slicing the sugar tax from two cents per pound to one cent.

Canada's gold production this year will, in all likelihood, approximate 3,000,000 ounces. Last year production was 2,947,618 ounces. What the average price throughout the year will be can not be guessed. If, however, the figure which the minister gave—one of \$85 an ounce—is maintained, then on an estimated production of 3,000,000 ounces the treasury might be enriched as much as \$10,500,000, which would more than offset the drop of \$6,000,000 in the sugar tax reduction. At least a revenue of \$7,000,000 is expected.

Reduction In Interest

Saskatchewan Minister Of Agriculture Would Ease Burden Of Farmers

Ottawa.—Reduction in the interest on public and private debt was urged by Hon. W. C. Buckle, Saskatchewan minister of agriculture, before the Stevens price spreads and mass buying parliamentary probe.

"A tremendous burden would be lifted from agriculture if a drastic cut in interest rates were made," the Western minister declared. "Taxes could be reduced and the beneficial effect upon both industry and agriculture would be almost immediate." Inquiry by a Dominion commission "with adequate producer representation" into livestock marketing in all its phases was recommended by Mr. Buckle. The witness placed before the committee a resolution of the Saskatchewan legislature supporting this suggestion.

Better Dairy Prices

Saskatoon.—Heartened by the firm condition of dairy prices during the winter, J. A. Caulder, Toronto, president of the Dairy Corporation of Canada, expects "good production" of dairy products this year and prices nearer normal than in other branches of farming. There was decided improvement, however, in other commodity prices as well.

SUGGESTS RADIO BE OPERATED BY A COMPANY

Ottawa.—The flat suggestion Major Gladstone Murray of the British Broadcasting Corporation be brought to Canada to take charge of broadcasting here was made in the House of Commons radio committee by G. A. Greer, Montreal. Major Murray last year completed a Dominion-wide survey of radio in Canada and presented a report to Premier R. B. Bennett.

"He tried," said Mr. Greer, "to put radio in Canada back on a non-political basis. He failed. With his report to the government he submitted to Premier Bennett a private report on policy in radio. I happen to know he submitted a personal report to the prime minister."

Canadian radio should be operated by a company, with a board of five directors who received no salary. "I recommend negotiations be entered into to obtain Major Murray," he said. "Do you think a salary of \$15,000 to \$20,000 would intrigue Major Murray?" asked Dr. Raymond Morand, chairman.

"I happen to know he would have come to Canada for that figure," replied Mr. Greer.

The radio commission, he continued, with more sympathetic treatment of newspapers, would have received more sympathy from the public. The company to take over the commission's work, he explained further, would take over all stations, appointing station managers and employees.

Sensational Charge

Clain Trotsky Plotted Revolutionary Dictatorship In France

Paris.—The sensational charge that Leon Trotsky plotted for a revolutionary dictatorship in France through the fatal February street riots was disclosed by authorities as the exiled Red army leader hunted vainly for another refuge.

They said a manifesto he issued after the disorders called for "an armed workers' militia," and declared that "war has just begun between them; there is no possible peace, but in a fight to the death; in the street, by force, must be decided the future." Police pressed the "bewildered Trotsky to move on from his villa in suburban Barbizon, where he had lived mysteriously for four months until gendarmes raided it recently.

Officials said they wanted him to leave as soon as possible, but were willing to be patient for a few more days in "view of the menace to his life." Where he can go was a matter of conjecture.

Sees Spot On Planet

Portland, Ore.—A spot on the planet Jupiter is making a night owl of A. V. Goddard, Portland astronomer. Goddard says the spot moves across the planet in about three hours' time each night. Through his 16-inch telescope Goddard has been watching the phenomenon closely, but is unable to explain its presence.

Want Air Mail Resumed

Calgary.—The council of the Calgary Board of Trade has wired Prime Minister R. B. Bennett supporting the resolution of the Winnipeg Board of Trade that air mail contracts be resumed with Canadian Airways, Limited.

United Palestine Appeal

Montreal.—To date \$61,000 from eastern Canada has been collected in the \$200,000 United Palestine appeal, it was announced. Returns from Winnipeg to the Pacific coast have not been available.

Ruling On Annuities Tax

Calgary.—This only was quarter of Dominion government annuities are subject to income tax is the effect of a ruling handed down by Mr. Justice Frank Ford, who allowed the appeal of Dr. J. S. McEachern against the Alberta income tax department.

Hard On the Mud-larks.

A Toronto magistrate has announced that motorists brought before him for splashing pedestrians will have to stop driving for a while and he started his campaign by fining one driver ten dollars and suspending his license for one month. A Connecticut magistrate found a mud-splashing motorist guilty of "assault and battery with an automobile" and fined him five dollars. The Toronto method at least has the effect of lessening the number of cars using the streets in wet weather.

Who Made Cold Cream.

Not every woman who anoints her cold-chafed skin with that homely ungent, cold cream, knows that it was invented nearly two thousand years ago by the great physician, Galen.

When Galen was seventeen years old, his father, who intended the youth to be a philosopher, had a dream which changed his views. He thereupon decided that in the profession of medicine his son would gain honor, and, though Galen left numerous books on medicine, his cold cream was the most famous of his discoveries. He made it of white wax and olive oil in which rosebuds had been steeped, and it has changed very little during its long history.

Not Only for Books.

The suggestion is made by an Englishman that the British Government set aside a day each year for the return of books which have been borrowed. But why stop at books? asks an exchange. Why not include shovels, axes, and at host of other articles too numerous to mention? We venture to say that if a law were passed making it compulsory to return borrowed articles to their rightful owners, in a certain week, there would be such a wild scramble that a hectic session on the Stock Exchange would be a tame affair by comparison.

True Initiative.

Once a man found a fat white worm eating his cucumber vines. He didn't rave at it; he took it down to the river and caught a fat catfish and fed his family of 9 children for a whole day. That's initiative!

Heard on Main Street
He—"My! You look like Helen Brown!"
She—"Thanks! I look worse in white."

Chinese Royalty Visits Canada

Crossing Canada as their fastest way of reaching the Orient to join an Imperial relative at his court, Princess Junho, her husband, T. K. Chang, and their little baby are seen as they arrived in Halifax recently in the Canadian Pacific liner Duchess of Richmond. Princess Junho is the second sister of Emperor Kang Teh, the young man who as an infant was proclaimed Emperor of China and is now Emperor of Ta Manchu Tikoo, the Manchurian state created by Japan. Little Ying Teal, eighteen months old daughter of Princess Junho, was born in London where her parents have lived in recent years. The princess and her husband both speak English perfectly and are seen to be smartly attired in European clothes. Holding rosy-cheeked and pretty Ying Teal is Miss Florence Killen, a stewardess in the Duchess of Richmond, who had care of the little girl during the voyage across the Atlantic. The party sailed from Victoria April 7 in the Empress of Canada.

Notice of Preparation of Assessment Roll.

Town of Stony Plain Assessment Roll 1934.

NOTICE IS HEREBY GIVEN that the Assessment Roll of the Town of Stony Plain for the year 1934 has been prepared and is now open for inspection at the office of the Secretary Treasurer of the Town from ten o'clock in the forenoon to four o'clock in the afternoon on every which is not a public holiday except Saturday and on that day from ten o'clock in the forenoon until two o'clock in the afternoon and that any person who desires to object to the entry of his name or that of any other person upon the said Roll or to the assessment of any property or to the assessed value placed upon any property must within thirty days after the date of this Notice lodge a complaint in writing with the Secretary Treasurer of the Town.

DATED this 11th day of April, 1934.
JAS. MALLOCH,
Secretary-Treasurer.

Stony Plain and District

Val Mohr, Mudare, was a visitor on Saturday in Stony. Gust Gitzel is busy shingling his big barn at present and hopes to have it finished before seeding. -Haddon item in Grand Prairie Tribune.

A largely-signed application for free ammunition, by members of Stony Plain rifle club has been forwarded to the officer commanding military district 13, at Calgary.

English services will be held next Sunday, April 29th, at 7.30 p.m., at St John's Lutheran church, Blueberry. A lantern slide lecture will be given after the service. A cordial invitation is extended to all. Rev H Kuring, pastor.

The dancing recital given by the pupils of Miss Peggy Atkin on Friday Evg. last was well patronised.

BUTTER AND EGGS WANTED at The Royal Cafe.

Card of Thanks.

Henry Gieselhaus and Family wish to thank Mr Philip Litzberger for his kindness on the occasion of their removal from their former home. We also thank Mr and Mrs C Witter, Miss and Mrs N Bauer Sr., Mrs C Albrecht, Mr W Fitzpatrick, Mr P Braunstahl, Mr Joe Rodoloff.

The Culture Films.

The three German films shown in Stony on Saturday Evg. proved to be a very pleasing feature. Standing room only, was the order, long before the clicks of the projection machine were heard. The many pictures depicting scenes in the Fatherland appealed specially to the older ones in the audience. The younger ones in the audience, also, were interested in the films showing historic castles, the Alps, the Rhine, Hamburg and in the various activities of the turnverins. Those who had difficulty understanding the long words in the sub-heads were helped considerably by the explanations given in English.

There is promise of similar pictures being given here in the near future: the crowded auditorium on Saturday showing how popular these features are here.

Conference at Blueberry.

(Continued from page 1.)

for Kuring and members of St. John congregation. In a formal resolution the hosts and hostesses were accorded a hearty vote of thanks for their hospitality.

The work of this branch of the Lutheran Church was begun in Alberta in 1894 when Rev E Eberhardt entered upon his long career in Stony Plain; and upon recommendation of the Conference this 40th anniversary is to resolve that recognition at the district convention to be held July 4-10th.

Those who attended were: Rev A Meitler, Alhambra; Rev A Appelt, Wetaskiwin; Rev G Raschke, Camrose; Rev W O Eifer, Leduc; Rev B F Behrendt, Beaver Hills; Rev A J Mueller, Rev H J Boettcher, Rev O Thiel, Prof J H Herrellsen, Dir. A H Schermerhorn, Edmonton; Rev H Fry, Golden Spike; Rev E Eberhardt, Mr W Rosnan, Mr F Enders, Stony Plain; Rev H Kuring, Blueberry; Rev A H Redvers, Tumbawlag; Rev E Hopka, Prince George; Rev W K Kautz, Hochfort Bridge; Rev H J Kretsch, Olney Prairie; Student Louis Laski of Bright View, Alberta.

Pruneau-Hebert.

On Thursday, April 19th, at St Joseph's cathedral, in Edmonton, Miss Cecile Pruneau, of Alma-ville, Quebec, became the bride of Mr Peter Hebert, a well-known farmer of the Spruce Grove district. Rev Father Keenan of St Joseph's church, tied the nuptial knot.

Holborn Happenings.

One of the best plays that has ever been presented in this district was put on at the local hall on the evening of Apr. 13 by the Horse Hills Dramatic Club. The acting was wonderful, the various parts being carried out in a very natural manner. A good crowd attended the play and also the dance which followed.

A clean-up day was held at the hall on the 18th; those who attended worked hard at straightening up things around the yard; about twenty trees were set out along the north and east side of the grounds. Lunch and a good supper were served by the two cooks of the gang.

Practically all of the farmers in the district are out in the fields now.

The Holborn ferry was launched on the 12th, with Pilot Karl Propp at the wheel. Mrs Macdonald was the first passenger on the ferry's maiden trip of the 1934 season.

A surprise party was given on the two Partridge people left at home; games and dancing held sway until the wee small hours. This party was given on the 16th. These people have since moved to their new home in the Bullied District.—H.J.H.

Brightbank News.

The recent fine weather, with quite a lot of wind, has dried the ground, so everybody is in the fields. Hansen Corner farmers report having considerable wheat sown.

Mr Geo. Hansen is recovering his recent illness.

Mr S Anderson, the well-known contractor, has made considerable alterations in the J Schiedeman house.

Miss E Krouse has been on the sick list, but is slowly recovering.

Mr John Rabia has returned from a visit with friends and relatives in the East.

Mr W Hodgson has purchased several fine ewes from the A Krouse ranch.

Spruce Grove News.

Mr Bert Hunter, Edmonton, is now on the official staff of the Spruce Grove Hardware.

Mr and Mrs Dan Brox, accompanied by Herman Ducholke, motored down to Gul Lake on Sunday.

Mr Romeo Rivelet, proprietor of the Hi-way Garage, has had his new twin gas pump installed, from which British America gas will flow.

Sat. June 30 is the date set for the sale of lands for unpaid taxes, the sale taking place in Municipal hall. Quite a large number of lots in the various sub-divisions bordering on the City are on the list.

Mr Harry Brox is making a good recovery from his recent indisposition.

Mr McKean wishes to advise that his 2d-hand farm machinery is off the market.

The Deadly Cigaret Stub.

Beware of prairie fires!—Owing to the dry condition of the prairie and the high winds which are at present prevailing, much care should be exercised in prevention of fires.

Even the discarding of a cigarette stub in the place where it isn't wanted usually brings on a multitude of troubles.

A Very Good Idea.

The Prince of Wales, who knows a thing or two, was once asked what he thought of civilisation. He said it was a good idea, and he thought it would be a good thing if some one would start it. Those who have an impression that civilisation exists had better read over the Sermon on the Mount, which furnishes a basis for true civilisation.

The Patient Escaped.

The following appeared in the Thorby and District items in the Leduc Representative:

"Twenty years ago or more when Thorby's well known physician Dr. M. Hankin was receiving instructions imparted to a class of students by an Edmonton surgeon going thru the wards of an Edmonton hospital, the surgeon halted by the bedside of a doubtful case. 'Now,' he asked, 'is this a case for operation?' The doctor students made their diagnoses and each decided it was not a case for operation. 'You're all wrong' said the surgeon. 'I shall operate tomorrow.' The patient, who in this case happened to be Ed Brosman, the blacksmith at Sunnybrook, jumped out of bed exclaiming 'No you won't—12 to 1 is a good majority to me, so gimme my clothes. Ed has never been back since.'
